# Company Overview

## AI Enabled Compliance Ecosystem

World's First Artificial Intelligence (AI) & Blockchain digital ecosystem and compliance management toolset that validates, monitors and certifies regulated businesses and the products they sell.

## Industry Empowerment

Enabling and empowering all players in the supply chain from consumers to merchants, banks to regulators, and labs to commerce platforms.

## Leadership Expertise

The Qredible Executive team have over 140 years of leadership, entrepreneurship, and technology experience with multiple successful exists.

# Regulated Industry Opportunities

## Supplements and Nootropics

Rapidly growing market with complex regulatory frameworks varying by state infiltrating traditional businesses.

## Life Sciences

Multi-billion dollar sector with increasing regulatory scrutiny and verification needs. Includes: Nutraceuticals, Peptides, Psychedelics, Biotech and more.

## On-Line Pharmacies & Telehealth

Online pharmacies and telehealth are booming digital health sectors, rapidly expanding healthcare access and convenience worldwide.

## Regulated Product & Services

Products and services that are regulated and/or have significant legal requirements for commerce: Tobacco, Firearms, Alcohol, Dating, Gaming, Organic Foods, Digital Services, etc.

# Industry Challenges

## Banking & Payment Hurdles

Service interruptions & denials due to risk and management complexities

## Inefficient Manual Workflows

Heavy reliance on human capital to manage compliance

## Regulatory Complexity

Inconsistent and dynamic federal & state rules and requirements - heavy reliance on human capital to manage compliance

## Consumer Trust Gap & Intensifying Class Action Litigation

Skepticism about product legitimacy and safety & growing litigation risk to brands

# Q-Trust is the Central Source of Truth, Trust, & Credibility

**Qredible's Ecosystem, powered by Q-Trust, connects all industry players empowering collaboration and accountability**

Q-Trust connects, verifies, and validates all data points from regulatory bodies, merchants, distributors, manufactures, labs, banks, payment processors, commerce, and ancillary businesses into a single ecosystem to enable all players to ensure adherence to all facets of regulatory and business requirements, creating efficiency, mitigating risk, improving revenue, and ensuring safe commerce.

# Qredible<sup>®</sup> solution

## RPA & AI Validation

Validating business credentials, product requirements, marketing claims.

## Secure Commerce

Enable legal distribution and sales with confidence and compliance with volatile regulatory rules.

## Automated Monitoring

On-going real-time monitoring ensures compliance is maintained

## AI & Blockchain Compliance Management

Streamlined business, product, document, and marketing content management

# Transforming Compliance Management

## Empowering the Supply Chain: Shared Compliance, Shared Success

Qredible fundamentally transforms compliance for high-risk industries by replacing closed, manual, processor-centric systems with an open, collaborative ecosystem.

## From Black Box to Glass Box: Enabling Continuous, Collaborative Compliance

Qredible replaces black-box compliance tools with a transparent, real-time platform where brands, processors, auditors, and regulators seamlessly interact and share compliance data across the entire supply chain.

## Empowering Brands: Practical Solutions for Compliance Success

The platform not only identifies compliance gaps but also empowers brands to improve compliance with seamlessly integrated tools or complete replacement of outdated legacy systems.

|          | 50         | 500       | \$352K    | 5.2X           |
| Client E | ISO Agents | Merchants | Total ARR | Network Effect |
|          | 35         | 350       | \$266K    | 3.9X           |

## Revenue Projection with Key Assumptions

12-Month Linear Revenue Ramp

### Triple Revenue Stream Network Effect

Each card processor relationship unlocks three revenue streams: (1) Base processor license ( $5 \times \$68K = \$340K$ ), (2) Merchant network access ( $7,450 \text{ merchants} \times 5\% \times \$3K = \$1.12M$ ), and (3) ISO Agent/Sub-ISO licenses at \$349/month ( $745 \text{ agents} \times \$4.2K \text{ ARR} = \$3.12M$ ). At conservative 5% merchant penetration, 5 processor relationships generate \$3.92M ARR—an 11.5x network effect on the base enterprise sales. This triple-layered B2B2B2C model demonstrates exceptional capital efficiency, with each sales dollar generating over \$11 in ARR. The ISO agent layer alone adds \$3.12M annually at full ramp, representing a completely incremental recurring revenue stream that requires minimal additional sales effort once the processor relationship is established. The \$349/month per-agent pricing delivers strong unit economics while maintaining accessible entry points for ISO agent adoption, creating predictable high-margin MRR.

# Go-to-Market Strategy

## Industry Presence

Engagement in trade group memberships, trade event podcast, webinars, Qredible Live podcast series, and partner programs all contribute to awareness, education, and engagement.

## Strategic Partnerships

Regulator Agencies, Payment Processors, Banks, Labs, Card Brands, Insurance Providers. Commerce Platforms and others drives direct revenue and partner client conversion.

## In Platform Upgrades

In platform engagement with FOMO teasers and gamification increases self service conversion

## Marketplace Magnetism

Industry marketplace ecosystem connecting Qredible partners, products and services with D2C businesses drives partner value and revenue.

# Market Adoption Strategy

## *Accelerating Qredible's Reach*

Q-Trust SaaS solution sold to **financial institutions, regulators, and industry groups** connecting merchant base with shared revenue model enabling coerced adoption

Channel Partners

Merchants subscribe to the Q-Trust registry directly, gaining access to Q-Marketplace's network of verified service providers. Revenue sharing agreements with all network partners create multiple income streams.

Direct to Merchant

Technology licensing to **POS, Underwriting, CRM, and commerce platforms** generates SaaS revenue while connecting users to the broader Q-Trust ecosystem, with integration partners sharing in resulting opportunities.

Integration Partners

This multi-pronged approach creates network effects that accelerate adoption and establish Qredible as the compliance standard across regulated industries.

# Competitive Differentiators

## Ecosystem Transparency

Replaces closed, processor-centric compliance systems with open, collaborative platform where all participants share real-time compliance data.

## AI-Driven Intelligence

Automates manual audit processes with exception-based oversight, dramatically improving efficiency while reducing compliance costs across the supply chain.

## Embedded Solutions

Provides practical compliance tools that integrate directly into existing business operations rather than requiring system replacement.

## Industry Authority

Establishes single source of truth for compliance verification using AI and blockchain technology for immutable, standardized records.

# Qredible Use Case Solution:

## Q-Trust FI Enables Safe, Scalable High-Risk Merchant Management

Q-Trust FI

Portfolio-wide visibility of business, product, and website compliance.

Q-Monitor

Ongoing surveillance of merchant web and content activity for violations.

Q-Verify

Instant validation of COAs, licensing, and labeling against regulatory benchmarks.

MyCOA Integration

Merchants sync COAs from labs to reduce onboarding friction.

## IMPACTS

- Reduced underwriting time by **78%**
- Reduced ongoing compliance management by **98%**
- Increased portfolio margin and revenue
- Mitigated regulatory risk at the **portfolio level**
- Improved processor's standing with sponsor bank and expanded high-risk approval capacity
